NPIC/TSSG/RED-1965-69
15 December 1969

MEMORANDUM FOR: Executive Officer, TSSG

SUBJECT : Training Requests

25X1 1. I am sorry that the attached training requests were forwarded without endorsement and written explanation. This was an oversight on my part. You will note, however, that each one had been initialed by []

2. RED has reviewed both of these requests with considerable scrutiny, realizing the current restricted status of training funds. Both of these courses are job related. [] is RED's in-house expert on computers. This is his whole responsibility and the reason that he was recruited. 25X1

3. Analog and hybrid computers are used in various pieces of developmental equipment. The Automatic Stereo Scanning System, the Automatic Target Indexing Device, and the High Precision Micro-stereoscope are cases in point. Many of our pieces of equipment contain analog computers in the form of control servos. The finite automata is, of course, the mathematical and logical background upon which computer technology is built. These courses represent a continuance of an after-hours program started by [] while still with the Office of Computer Science. Two courses complete [] requirements for a Master's Degree with the exception of his thesis work. These courses have been approved predicated upon their not interfering with his work responsibilities. [] assures that we can make the necessary adjustments in this area. I strongly recommend approval. 25X1
